

This title presents a complete digital solution for computer applications and concepts. SimNet XPert works great as both a standalone product or as a supplement to a McGraw-Hill/Irwin or McGraw-Hill/Microsoft Press title. SimNet is McGraw-Hill's industry-leading applications training tool that provides live, context-based assessment as students work. Using a realistic facsimile of the actual Office application environment, the program guides students through the tasks and skills necessary to make them fully fluent in Microsoft Office. A Tutorial mode even provides a brief lesson in the skill before encouraging students to try it for themselves. This is the most realistic and comprehensive Office training product on the market today.
